Title: Pre-treatment preferences and characteristics among patients seeking in vitro fertilisation

Authors:

Anthony P H Walsh (drtonywalsh@sims.ie)
Gary S Collins (Gary.Collins@csm.ox.ac.uk)
Monique Le Du (mpuig@chpg.mc)
David J Walsh (drdavidwalsh@sims.ie)
Eric Scott Sills (drscottsills@sims.ie)

Version: 2 **Date:** 26 November 2009

Author's response to reviews:

Dear Editors, Although neither reviewer offered mandatory changes there were some helpful suggestions that were incorporated into this work. Specifically, the discussion (p.6) has been strengthened by including additional comments on the scope of the research. We also now mention IVF risk in the final paragraph on p.6, as recommended. Thank you for this assessment which has improved the quality of our paper.
