

Reviewer's report

Title: WHO Global Survey on Maternal and Perinatal Health in Latin America: classifying caesarean sections

Version: 1 **Date:** 9 October 2009

Reviewer: michel bouvain

Reviewer's report:

The article is very interesting and well written. Just a very minor comment: in Table 1, the heading is "parameter", which has, in statistical language, a different meaning. I would recommend using words as "characteristic" or "variable".

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
