

Author's response to reviews

Title: Antenatal Screening and the Gendering of Genetic Responsibility

Authors:

Kate Reed Dr (k.reed@sheffield.ac.uk)

Version: 3 **Date:** 19 September 2007

Author's response to reviews:

Please find revised manuscript attached. I just have one query. In the text you suggest adding other authors names. I am the only author. In the social sciences it is common practice to have single authored work. I am not sure what to do about this as no one else was involved in writing this study protocol?

Best wishes,

Dr Kate Reed.
