**Version:** 3 **Date:** 27 March 2009

### **Author's response to reviews:**

I accepted most of the editorial changes which were in track changes as suggested by the editorial team. I also made additional typographic and grammatical changes in a few areas. Some changes in table 2 were implemented after realising that there was an error (of 4 cases) in the total number of women aged 15-49. Corresponding changes were also reflected in the text.
